2. Cabinet has taken note of the actions initiated following the oil spill from MV Wakashio as from 6 August 2020, namely, –

- (a) around 3.9 kilometres of booms had been deployed at the Blue Bay Marine Park, Pointe d'Esny, Mahebourg Waterfront and in the lagoon area around MV Wakashio. Additionally, some 10 kilometres of artisanal booms of the private sector and civil society organisations had been placed at various sites. To protect the Blue Bay Marine Park, around 1,800 metres of booms had been deployed thereat;
- (b) a total of 3,240 metric tons of oil had been pumped out of the vessel and the pumping exercise was ongoing for the remaining 110 metric tons;
- (c) coastal water quality at 15 sites was monitored on a daily basis, from Blue Bay to Trou d'Eau Douce;
- (d) cleaning at the affected sites was underway by the National Coast Guard, the Special Mobile Force, the Ministry of Environment, Solid Waste Management and Climate Change and other public organisations along with private sector participation and the civil society. Some 728 metric tons of contaminated waste oil had been collected, out of which 225 metric tons had been sent for recycling and 503 metric tons had been temporarily stored at the Hazardous Waste Interim Storage Facility at La Chaumière; and
- (e) eleven experts from France, six from Japan and five from UN Agencies, with various competencies, were already in Mauritius. The Diplomatic Missions of Australia, India, United Kingdom and the United States of America were liaising with the relevant Mauritius focal points with regard to possible assistance in terms of equipment and technical experts.

As part of phase 2 of the oil spill response, which is the clean-up and restoration, a team of environmental experts from the International Tanker Owner's Pollution Federation

Limited and from Le Floch Depollution, the international contractor appointed by the Protection and Indemnity Club, the Insurer, were in Mauritius.

Additional foreign expertise was being sought on environmental laws, ecosystem rehabilitation, site bio-remediation, marine biology, mangrove, remote sensing, terrestrial biodiversity and species rescue, with a view to effectively deal with the aftermath of the oil spill.
