3. Cabinet has taken note that the Immigration (Advance Passenger Information and Passenger Name Record Data) Regulations 2021 and the Civil Aviation (Collection of Data from Operators of Private Flights Landing in, or Departing from, Mauritius) Regulations 2021 would be promulgated to facilitate the introduction of a Passenger Information System for the enhancement of Border Control Management in Mauritius. The Immigration (Advance Passenger Information and Passenger Name Record Data) Regulations 2021 would provide the regulatory framework for carriers serving Mauritius to send booking and check-in data in a timely manner to the Passport and Immigration Office (PIO). It would allow Border Control Agencies to carry out profiling of passengers in advance and to respond appropriately.

The Immigration (Advance Passenger Information and Passenger Name Record Data) Regulations 2021 would require commercial air transport operators to submit passenger data to the PIO within a specified time. As regards operators of private flights, once the Civil Aviation (Collection of Data from Operators of Private Flights Landing in, or Departing from, Mauritius) Regulations 2021 would be promulgated, they would have to submit the required data on passengers and crew to the Director of Civil Aviation.

4. Cabinet has agreed to the promulgation of the Mauritius Standards Bureau (National Management Systems Certification Scheme) (Amendment) Regulations 2021 and the Mauritius Standards Bureau (Certification Mark) (Amendment) Regulations 2021. The MSB (National Management Systems Certification Scheme) Regulations provide the legal framework for the effective operation of various Schemes. The rationale for the amendment of the MSB (National Management Systems Certification Scheme) Regulations is to -

- (a) include the amended logo for Sustainable Tourism with the wording “Blue Oasis”;
- (b) remove MauriGAP Certification as the latter shall be operated under the MSB Certification Mark Scheme; and
- (c) cater for a new logo that has been launched.

Under the MSB Certification Mark Scheme, the MSB grants licences to companies to use the MSB Certification Mark for the products/processes which meet all the requirements of the relevant standard. The Scheme also caters for certification based on Ecolabel Standards. It is proposed that the validity of licences issued under the MSB Certification Mark Scheme be reviewed from two to three years. The period of three years would ensure consistency for both Management System Certification Schemes and MSB Certification Mark Scheme.
